INDUSTRY COMPARABLE PAY RATE ADJUSTMENT - MCT

Therefore, we agreed at [DOS]+36 months a calculation will be made to determine the maximum regular hourly pay rate (i.e., base pay or chart rate plus all premiums e.g. license premiums, skill premiums, longevity pay, retention premiums (midnight retention), line premiums, weekend premiums and all other shift differential premiums) of the Maintenance Control Technicians at United, and US Airways (or their successors through merger or acquisition) in effect on that date.

Those rates will then be averaged (arithmetic mean) and compared to the equivalent Maintenance Control Technician rate at AA. If the AA Maintenance Control Technician maximum regular hourly pay rate is below the average, Maintenance Control Technician's will receive an increase equal to the differential between AA and the average to AA's maximum regular hourly pay rate. Such increase will come in the form of any coincidental structural increase and/or an addition to the Maintenance Control Technician Premium. This wage adjustment is in addition to the annual base/chart rate.

See attached example of the calculation.

While the Company currently envisions paying this adjustment in the form of an addition to the Maintenance Control Technician Premium, applicable to Maintenance Control Technician's, we reserve the right to use a different payment method (for example, adding the adjustment to the Base Pay Rate for Maintenance Control Technician's). In any event, the new Premium would be considered part of Eligible Earnings under the SuperSaver Plan and would be included in Eligible Earnings under the Profit-Sharing Plan.

It is understood between the parties that the purpose of this 'wage adjustment' provision is to ensure that the TWU Maintenance Control Technician are at minimum average in industry compensation at 36 months from DOS.
