Negotiations Update

Sisters and Brothers,

The Association's Executive Negotiating Committee met this week in Washington, D.C. with members of the National Mediation Board and representatives from the carrier.

Limited progress was made this week, and that is encouraging. After the carrier wasted the entire summer refusing to negotiate with the Association, any movement is a positive sign.

Our goal is not simply to reach an agreement with the company. Our goal is to reach the **right** agreement for Association members. We need to ensure any agreement provides the wages, benefits and terms that you have earned and deserve. That is why your continued patience and solidarity is so important.

Future negotiation dates are currently being discussed with American and the NMB.
